"I have completed my level 2 and am now working towards level 3 apprenticeships, these are great for helping to develop knowledge and skills that support the improvement of care delivery. I would like to progress to the nursing or nursing associate apprenticeships."

"I found the unit on the process and experience of dementia very interesting."

Cardiographer
Cardiographers use equipment to monitor the heart. You could use your interest in science and technology to work with patients.

The heart and blood vessels of the body are known as the cardiovascular system. They are assessed and monitored with in the cardiac department of a hospital. Cardiographers are healthcare science assistants and healthcare science associates who support cardiologists who are doctors specialising in the cardiovascular system.

As a cardiographer, you’d operate electrocardiograph (ECG) machines which monitor the heart. You would fit electrodes to the patient’s body, making sure they are correctly connected to the machine. You’d then take readings from the ECGs which the doctor uses to make decisions about treatment.

Healthcare Assistant
Healthcare assistants (HCAs) work in hospital or community settings, such as GP surgeries, under the guidance of a qualified healthcare professional.

As a healthcare assistant (HCA), you’ll work under the guidance of a qualified healthcare professional, usually a nurse. Sometimes staff working in HCA roles are known as nursing assistants, nursing auxiliaries or auxiliary nurses.

The work varies depending on where you’re based. In a hospital for example, you may be

- washing and dressing patients
- serving meals and helping to feed patients
- helping people to move around
- toileting
- making beds
- talking to patients and making them comfortable
- monitoring patients’ conditions by taking temperatures, pulse, respirations and weight

Dental Support Worker
Dental support workers are part of the dental health team. They help to treat patients and give advice on looking after teeth.

Dental support workers are clinical support workers who work as part of the dental team. In this role, you’ll work under the supervision of a dentist or a dental nurse to treat patients and give advice.

Working as a dental support worker, you’ll

- greet patients and reassures people who are nervous make appointments
- give basic advice about dental care
- keep records
- mix the materials for filling teeth
- help with x-rays
- sterilise instruments and equipment
- pass instruments to the dentist
- help patients with mouth rinsing

The work varies depending on where you’re based. In a hospital for example, you may be

- monitoring patients’ conditions by taking temperatures, pulse, respirations and weight
- talking to patients and making them comfortable
- toileting
- making beds
- helping people to move around

Phlebotomist
Phlebotomists collect blood samples from patients to help diagnose illness.

As a phlebotomist, you will take blood samples from patients. The samples are examined in a laboratory and the results can be used to diagnose diseases and conditions.

When taking blood, you have to be careful that you:

- don’t harm the patient
- don’t disturb any nursing care that the patient is receiving
- take the blood correctly so it can be used for testing
- label the samples carefully
- store the blood correctly
- deliver the samples promptly to the lab

Patients may be nervous about having their blood taken, so you have to reassure them and put them at ease.

Pharmacist
Medicines are the most common treatments offered to NHS and care patients. A pharmacist is an expert in medicines and their use. Their knowledge of medicines and the effect they have on the human body is critical for the successful management of every type of medical condition.

Pharmacists advise other healthcare professionals, including doctors and nurses, on

- how to choose medicines and use them correctly
- ensure that new medicines are safe to use with other medication
- advise on dosage and suggest the most appropriate form of medication such as tablet, injection, ointment or inhaler
- make sure that patients use their medicines safely
- provide information to patients on how get the maximum benefit from the medicines they are prescribed

Theatre Support Worker
Theatre support workers are part of an operating department team who support the surgical team. An important part of the work of theatre support staff is reassuring patients, who may be anxious about going into the operating theatre.

As a member of the theatre support staff, you may also

- move patients on trolleys
- reassure family members
- prepare patients for anaesthetic
- set out instruments and equipment ready for surgery
- make sure the department has stocks of items needed
- clean and tidy theatre areas after surgery
- dispose of waste
